CHINOOK

LOCAL ITEMS

Donald Connell returned last
week from Cochrane, where he
spent the winter with his uncle.

J. Nurcombe, Homestead In-
spector is in the Chinook district
this week.

Quite a number of young folks
from Chinook attended the dance
held in Laughlin School last Fri-
day night. They report a very
good time.

Nelson Murray, of Laughlin
district, returned last Friday from
Saskatoon where he spent the
winter.

Friends of Mr. Harry Smith
will regret to learn of the death
of his mother which occurred at
her home in Carleton, Ontario on
Wednesday, March 9.

An enjoyable party was held
on Saturday evening at the home
of Mrs. Todd. Four tables of
bridge were played and one of
five hundred. Mrs. Rennie was
the fortunate winner of the first
prize, a pretty bon bon dish, and
Mrs. Hurley the second prize a
vanity jar in lustre ware. Mrs.
Thompson and Mrs. Dolgon se-
cured the consolation prizes. At
the five hundred table, Mrs. Peter-
sen and Mrs. Stewart held the
highest scores, pretty lawn hand-
kerchiefs being the prizes awarded
to them.

Mr and Mrs. H. R. King, of
Kimmudly, returned this morning
from Los Angeles, California,
where they have been spending
the winter.

A meeting of the Directors of
the Chinook and District Agricul-
tural Society will be held at the
home of W. A. Todd on Saturday
afternoon, March 19, at 3.30.

B. H. Dial, auctioneer, will sel
by public auction the farm stock
supplement, and furniture, belong-
ing to James E. Martin on his
farm one half mile west of Chin-
ook on Thursday, March 24. See
posters for full particulars.

Melvine Chase, who has been
looking after his farming interest
in the Kimmudly district for the
past few weeks, returned to Alaska
on Friday.

John Mair returned on Wed-
nesday from British Columbia to
his farm south of town.

Mrs. Hope Forster, of Irricana,
arrived in Chinook last Friday,
and will teach school at Longford.

George Seegar, of Kimmudly,
left on Tuesday for Calgary.

M. L. Chapman was in Delia
this week attending a district
meeting of the Masonic Lodge.

E. E. Jacques was a visitor in
Youngstown on Tuesday.

Mr. and Mrs. W. E. Anderson,
of Heathdale district, who have
been spending the winter in San
Diego, California, returned this
morning.

Meeting of Councillors Of M. D. of Collholme

J. W. Shier was appointed reeve
for 1927, at a meeting of the
councillors of Collholme muni-
cipality held at the home of H.
Dunster last Monday. S. W.
Warren will act as deputy reeve
for the first six months.

All the councillors will act on
the finance committee with H.
Dunster as chairman.

The following is the By-law
committee: H. Dunster, R. Gor-
dianier and J. Ferguson.

J. W. Shier was appointed to
represent the municipality on the
Chinook Union Cemetery Board,
while S. W. Warren will represent
the council at the meetings of the
Clemens Rural Credit Society.

It was decided by the council
to give out to every ratepayer in
the municipality two ounces of
gopher poison for every quarter
section of land. Twenty-five per
cent. of the cost is to be paid by
the ratepayers.

L. S. Dawson was appointed
assessor for 1927.

The next meeting of the coun-
cil will be held Saturday, April 16.

Government Telephones

The Alberta Government Tele-
phone system showed a profit of
\$270,000 in operation in the year
1926, according to the annual re-
port of the Department. There
was an increase of revenue over
1925 of more than \$454,000.
There are now 20,413 rural sub-
scribers and 36,517 subscribers to
the urban system, making a total
of 56,930 subscribers for the entire
system, an increase of some 500
over the previous year.

Chinook School Literary Society

The members of the Literary
Society of the Chinook School
met in the Assembly hall on Fri-
day afternoon. The meeting was
opened by singing O Canada, and
the reading of the minutes of the
previous meeting. This was fol-
lowed by a program consisting of
the following items:

Duet, by Norma Hurley and
Marjorie Lee; Musical drill by
the Junior C.G.L.T.s; Piano solo,
Vincent Riedout; Dialogue en-
titled "Two Teachers," by Mabel
Clipsham and Francis O'Malley;
Five minutes speech, by Vera
Clipsham and Caro Dumanowski.
The meeting closed by singing
the National anthem.

Heavy Snow Storm

After a week of warm weather
a change in climatic conditions
came on Monday afternoon in the
Chinook district when the wind
from the north-east blew up a
heavy snow storm which lasted
over two days. This is one of the
heaviest falls of snow this winter.

The ladies card club was held
at the home of Mrs. Todd last
Tuesday evening. Mrs. Rennie
won the prize a fancy vase. The
club will meet next Tuesday eve-
ning at the home of Mrs. Elliott.

Name _____ Address _____

Welcome the Newcomer

The immigration season is just opening, and judging from all reports and present prospects, Canada is due to receive a larger influx of settlers than in any year since the period between 1900 and the outbreak of the war. This increasing stream of people into Canada results from a number of factors. In the first place, conditions in Europe are more favorable than they have been since the upheaval caused by the war, and people who have long been anxious to emigrate are better able to do so. Canada, too, has somewhat relaxed the restrictions imposed on immigration following the war and when this country, like all others, was faced with the problem of readjustment and the re-establishment in civilian life and employment of the hundreds of thousands of Canadians whose energies had been devoted to war activities and industries. Until our domestic problems of unemployment and rehabilitation had been solved it was generally considered unwise to allow any large numbers of new people to enter the Dominion.

The economic and financial situation throughout Canada has likewise enormously improved; employment is now general; great development enterprises are under way; railway and building construction is increasing; trade and commerce is steadily and rapidly expanding.

Agriculture has enjoyed several fairly prosperous years, and, whatever may be the difficulties yet to be overcome, they are being faced and solved, with the result that the Canadian farmer is today in a much better and more hopeful position than is his fellow agriculturist in the United States. The Canadian farmer through organization and co-operation has successfully met problems which still confront the United States farmer, and solutions to which he asks Government authorities to provide.

The success of the Western Pools, the steady reduction in taxation, Federal, Provincial and Municipal, decreasing railway deficits, increasing railway branch line construction, all are helpful factors in the economic structure, leading to confidence in Canada and encouraging to incoming emigrants as prevailing substantial reasons why they can succeed in this country.

But, as has been stated in this column on more than one occasion, successful colonization is much more important than quantity in immigration. Canada wants more people, no one disputes that fact. But, above all, Canada's future, growth, prosperity and sound national development demands that our immigrants be transformed in the shortest possible space of time into contented, law-abiding, prosperous people, resulting in permanent homes and good citizens.

To achieve this much to be desired end, governments, railways, and organizations of many kinds are doing much and can do more, but, in the final analysis, municipal and school bodies and the individual neighbors of these newcomers can exert the most powerful and helpful influence. Every rural municipal council, every rural school trustee board, should in fact be a small local colonization board, alert and ready to make welcome every, and every incoming settler, regardless of his race, creed or circumstances in life.

Present settlers should make it one of their duties of citizenship to extend a hearty welcome to their new neighbors, to offer such advice as may be necessary, and give a helping hand in time of sickness or difficulty. These newcomers, if thus encouraged, will become permanent residents. As they will help to develop the district and the Province. They will bear their share of the tax burden, and thus lighten it for all. Their presence will mean better roads, better schools, and the possibility of modern conveniences now considered out of the question because of cost to the present sparse and scattered population.

The eyes of the world, and especially of Great Britain and the rest of the Empire, will be focused on Canada in this year of its diamond jubilee. Tens of thousands of people will come to make their future homes in this Dominion. Their success in the great adventure means everything to them, but it will also mean much to the future of all Canada. No Canadian of today can render greater service to the country than by doing all that lies in his or her power to make immigration to the Dominion this year successful by the conversion of the newcomers, through sane and practical colonization, into permanent settlers and worthwhile citizens, the greatest asset of any country, and the only abiding foundation of national greatness in the truest meaning of the term.

Worked For Livingstone

Man Still Living in Transvaal Tended Sheep for Famous Explorer

Believed to be the last survivor of a Kafir tribe haunting the plateau land who knew and accompanied for test from the Crichton-Edwards Livingstone in his great work, Alexander, London, N.W., was Lazarus Raikane still lives, hale and hearty, in his native land, in the Vorending district of the Transvaal. He was the Transvaal Raikane, whose story and his father, Cape A. S. Wilkeson, were well known for years. He was born at a height of 2,000 feet, was born "long ago" in the Province of what was then called the Transvaal. When about 15 years of age he went into this and then into the Transvaal, where he went to Kuruman, where he met his father, who had been in the Transvaal, who employed him till, in relation to the ground below, to tend his sheep and draw water for him was completely still. Then, with the Transvaal, Raikane's show that another slice, haunting them he still Livingstone was to Kuruman in 1911. Another, he said, his air speed with it would, therefore, appear that Raikane must be in his 90th year. He was born in his 19th year. The Glasgow Herald.

Urges End of Wars

British Envoy to Washington Pleads for Anglo-Saxon Unity

"The sort of unity I want to see grow up among the English speaking peoples is a unity of heart and understanding," said Sir Esme Howard, British ambassador to Washington in a speech on Anglo-Saxon unity, delivered before the Twentieth Century Club at Washington. "I should like it to be an accepted fact," he added, "in the mind of every man, woman and child in all English-speaking countries that come what may--we still will never war with each other--that such a war would be like a duel between brothers--a thing unholy and impious, not to be even thought of."

"If we have to spend large sums on armaments," he said later, "let us at least do so without reference to the armaments of the other but only considering our own needs for protection generally. There can be no unity of heart or of purpose if we are going to begin eyeing each other with suspicion every time the other builds a new ship or develops some engine of destruction."

Speaking of conditions in Europe Sir Esme reminded his hearers that Great Britain could not ignore the continent in her efforts to preserve Anglo-Saxon unity.

Drives Out Rheumatism

Subdues Lumbago

Brings Ease and Comfort to the Sufferer at Once

NERVILINE

A King Over Pain

Those who seek permanent relief from the grinding pain of rheumatism and lumbago should read the letter of F. E. Normand, from Georgetown, who writes: "I was fairly crippled with aching joints and Rheumatism. Nerviline has been what I needed, because I cleared up my trouble quickly."

"If you need a reliable, strong, penetrating remedy, you can get Nerviline today; it will make you well quickly."

Alberta Oil Producers

Three different types of oil are being produced in the Turner Valley field near Calgary. Rosalite No. 4 and Vulcan are producing asphalt. Illinois-Alberta, gasoline and New New McElroy-Segor, crude. The last was producing 100 barrels a day by falling, and a pump is being installed.

CONDITIONS THAT CALL FOR A TONIC

Symptoms That the Blood is Thin Should Not Be Neglected

"Weak, lacking in strength, over-ambition, nervous, sleepless, poor appetite, digestion disturbed, these are the symptoms of a great majority of people who have been benefited by the use of Dr. Williams' Pink Pills. The great value of this medicine in cases of this kind is proven by the statement of Mrs. W. Hensher, Kingston, Ont., who says: 'Following a severe cold, I had a run-down, nervous condition. I had pain in the back and limbs and could scarcely move about. I did not sleep well at night and was dependent and discouraged. I decided to try Dr. Williams' Pink Pills, and can truthfully say that after the use of one box, the change in my condition was nothing short of marvelous. The pains vanished, I slept well, had a good appetite, and in every way felt well and strong. I also gave the pills to my daughter, who was in an anemic condition and feeling quite unable, and in her case, too, they restored health. I hope my experience may help some other weak person.'"

Dr. Williams' Pink Pills are sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockfield, Ont. A little book, "Building Up the Blood," which contains many useful health hints, will be sent free on request.

Liner for Jungle Airways

For a jungle airway from Khartoum through Central Africa to Kismayu in the Kenya colony, a distance of 1,200 miles, a big triple screw air liner is being ordered in England. It will be based on the flying boat built for the Air Ministry which proved to be the fastest in existence. Flying to the presence of rivers, lakes and swamps along the route, it will be possible by using seaplanes to alight at almost any point.

There is one re-bolting feature about a chronic borrower: he never strikes a man when he is down.

Corps are pointed forward. Hollaway's Corn Remover will remove them.

As a woman's journey fades her brain, come to the front.

Ceremonies may differ, but true politeness is the same the world over.

Minard's Liniment for rheumatism.

BAKE YOUR OWN BREAD WITH

ROYAL YEAST CAKES

The standard of Quality for over 50 years

After twenty years of practical experience and research, the late Dr. F. W. Parkes, noted cancer specialist, announced, in 1912, that cancer is caused by the deficiency of potassium "salts" in the body and if such deficiency is remedied, cancer, even in advanced cases, will retrograde. Before his death, this eminent English authority abundantly proved the truth of his assertion and, since then, the voluntarily written testimony of thousands of sufferers who state they have been completely restored has brought justified hope and confidence in countless others on both sides of the Atlantic ocean.

The public is but slowly realizing the unpleasant truth that while scientific refinement depresses all white flour and white sugar of the last trace of potassium, the boiling of our vegetables also destroys the health-giving potassium salts which an all-wise Creator originally placed in them and a civilized world, having eliminated its food values, is today consuming what Dr. Parkes has described as "junk minus minerals."

Such diet creates more acids than the human liver can neutralize and dispose of and the consequent inevitable potassium starvation results in rheumatism in any of its varied forms, goitre, eczema or any of the maladies caused by potassium deficiency, including ulceration of stomach, flatulence, heartburn, sourness of mouth, indigestion, constipation, etc. In fact, the most practically universal intestinal stasis or constipation of civilization, which are purgatives or laxatives will ever cure, is the certain forerunner of ninety per centum of all humanity's malady, of which cancer is the most deadly.

When, but not until drastic reform takes place in modern civilization, men and women appreciate their personal ability to avoid not only cancer, but almost all the prevalent maladies which are actually, if unreasonably self-indulgent. Till such drastic reform occurs, sufferers will continue to alleviate their distress by means of their weak, the small doses of The Cataplasma Treatment, which, with fully explanatory literature and interesting case reports, can be obtained from Charles Walter, 51, Broadview Avenue, Toronto, Ontario, Sole Canadian and U.S.A. representative of The Cataplasma Company of England.

Alaska may be the land of the midnight sun, remarks the Los Angeles Times, but we don't have to go that far to find the land of the I am daughter.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. C. Williams' Asthma Remedy. So sure do they feel that complete relief is placed on this true specific with the remedy that it will be their daily habit to take it. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

The fiddler crab is so called because the male has one brightly colored claw of immense size, which, when he runs, he waves as if he were playing a violin.

Relieves Indigestion Very Quickly

Men and women all over the world are suffering from indigestion. It is easy to swallow, purely vegetable pill, after meals, to prevent and relieve attacks of indigestion and sick headache.

Millions also recommend them as a mild, gentle laxative, moving the bowels without pain, and leaving a pleasant after feeling.

These little pills are a doctor's prescription and have been sold by all druggists as CARTER'S LITTLE LIVER PILLS.

They do not contain Mercury, Calomel or habit forming drugs. Try them tonight and feel refreshed to-morrow.

All druggists recommend CARTER'S LITTLE LIVER PILLS. Men, women and children take them as a daily regulator.

All Druggists, 25c and 75c. red packages.

Keep Minard's Liniment in the stable.

Has Powerful War Weapon

British Guards Secret of Mysterious Invisible Searchlight Ray

The British Government is jealous of guarding its new war secret, a mysterious invisible searchlight ray which makes it impossible for an enemy to conduct military operations at night unobserved.

It is one of the most formidable war weapons yet discovered, and it was discovered accidentally.

John L. Baird, inventor of the television, and the discoverer of the mysterious ray, accidentally stumbled on the new ray while he was trying to perfect the television apparatus with which he now broadcasts pictures by radio as far as 150 miles.

It belongs to the infra-red section of the spectrum outside the range of the human eye. His process is to locate and use the ray which the human eye cannot see, but which is susceptible of being recorded on his secret apparatus.

"By proper adaptation of these principles," he disclosed, "it will be possible to see an enemy in the dark when he believes himself to be unobserved."

So far we are seeing over comparatively short distances, but it has now become simply a question of time (technical improvements and the application of greater power in order to be able to see a person or a scene which is thousands of miles distant from the point where we are looking into the receiving screen).

The associate, Captain O. G. Hutchingson, goes even farther. "At night, the searchlight apparatus, under the cover of darkness will be disclosed to the defending headquarters by the electric eye of the television. They will be followed by searchlight emitting invisible rays, and as these rays will be unseen by them, they will continue to approach until, without warning, they are brought down by the guns of the defense."

STOMACH MISERY, GAS, INDIGESTION

"Pape's Diapiesin" Corrects Sour, Upset Stomachs at Once

"Pape's Diapiesin" is the quickest, surest relief for indigestion, gases, flatulence, heartburn, sourness of mouth or stomach distress caused by acidity. A few tablets give almost immediate relief. Correct your stomach and digestion now for a few cents. Druggists sell millions of packages.

Assistance for Gardeners

Articles on Horticulture Are Being Prepared at University of Saskatchewan

To stimulate interest in horticulture in Saskatchewan, and to assist those interested in growing horticultural plants in this province, the department of horticulture, University of Saskatchewan, is preparing a series of short articles on reasonable topics relating to horticulture. This series will include "The Garden Area," "Planning the Home Garden," "Vegetables for the Home Garden," "Fruits for the Home Garden," "Annual Flowers for the Home Garden," "Perennial Flowers for the Home Garden," and others. The articles will be sent by mail on application to the University.

Explanation is Simple

Talking fatigues women less than it does men, a Finnish scientist says in a dry objective way, without entering into the controversy as to whether the female is more talkative than the male. The scientist explains his statement by two facts: First, that the greater the length of the vocal cords, the more energy is required to produce a sound; second, that the vocal cords of women are shorter than those of men.

A son at college wrote to his father: "No more, no fun, your son."

The father answered: "The father answered: 'For God's sake, your dad, your dad.'"

Gores Feet Before It. — There are many who have been afflicted with hemorrhoids have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is clean, but its power is in no way expressed by its low price.

Eating animal fat, in the form of butter, lard or meat, is now found to be of great assistance in warding off tuberculosis.

Only one member of a president of the United States lived to see his son inaugurated the mother of William McKinley.

Road to James Bay

Ontario is Interested in Development of North Country

There was a hint in the speech from the throne at Toronto that the railway into northern Ontario will be pushed another step toward James Bay this year. The project was not started with a view to opening up an outlet to the northern area, but to open up the country for settlement. The results have justified the undertaking and will likely lead eventually to its completion. It was worth building the railway to bring the development that has occurred in the Cobalt country, and the mineralized zone extends north of that district indefinitely, perhaps even to the shores of the bay. — Edmonton Bulletin.

Publicity As the Basic Factor In Development of Markets for Natural Products of Canada

Publicity as the basic factor in successful salesmanship is receiving an increasingly large measure of attention at this time. The movement is not confined to this continent, where the art of advertising was first cultivated. It has spread to Great Britain and the continent of Europe and before long the world is likely to see a rivalry in that direction that cannot but exert a marked educational effect. Addressing the annual convention of the Fruit Growers' Association of Ontario and the Niagara Peninsula Fruit Growers' Association at Hamilton, when presenting the report of the work of the Canadian Horticultural Council for last year, Mr. E. B. Laue, of Montreal, stressed the importance of an organized campaign of advertising. Voicing the opinion that the Canadian apple was the finest in the world, he pointed out that through advertising, fruit growers could educate the public to eat a baked apple instead of a grape-fruit for breakfast. Instead of sending their money out to foreign countries, Canadians should buy their own products. This is sound advice, and the way to give it practical effect is by utilizing in every possible direction the publicity methods that have proved their ability to create gigantic and profitable business enterprises.

Earlier in the year Mr. J. Allan Ross, Canadian manager of the William Wrigley Company, a convincing example of a concern built up and sustained through extensive advertising of a product of defined quality, declared in Toronto that no land nor people is blest with greater semi-dormant riches than Canada. He pointed out that Britain and the United States provide a market of 150,000,000 people to whom the offer of Canadian opportunity can be made. But the process will be very slow if an intensive selling of that opportunity is not carried on in every sound and reasonable way over the next five years. Mr. Ross suggested that a sum of \$8,000,000 should be placed in the Federal budget every year for the next three years to be spent specifically in telling the people of Great Britain and the United States about Canada. In the next three years, her golden opportunity and certain future. That, he said, would be good salesmanship. Possibly mention of a sum like \$8,000,000 may seem ridiculous to many people. But when one considers the immense sums appropriated by commercial concerns for publicity purposes that have only a small fraction of the value Canada has to offer, the suggestion assumes another aspect. Judiciously planned and expended, advertising is really an investment with much greater certainty of profit than can be assumed in the case of less extensive and varied marketable offerings.

Would Produce Sugar for Prairies

Alberta Sees Possibilities of Supplying Sufficient Sugar for Western Market

The possibility of Alberta becoming the domestic producer of sugar for the entire Prairie Provinces was suggested by T. G. Wood, district manager of the Canadian Sugar Factories at Edmonton, who stated there was room for at least eight or ten more factories with a capacity of 1,000 tons of beets per year. Producing sugar for the entire population would mean the utilization of about 100,000 acres of irrigated land which would employ 50 valuable men. The Mexican cacao bean up to fifty years ago that the population used it as money.

Tomato is a Fruit

That old question regarding the status of the tomato, which has been stirring up strife for years, has finally been settled by Order-in-Council of the Dominion Government. Henceforth the tomato is to be termed a fruit, in so far as the Dominion Department of Agriculture is concerned, according to a statement by Fruit Commissioner McIntosh at the Ontario Fruit Growers' Convention in Hamilton.

Liza was on the witness stand. "Are you positive," inquired the prosecutor, "that you know where your husband was on the night this crime was committed?" "Et Ah didn't," replied the witness firmly. "Et Ah busted a good rollie pin off an innocent man's bald, dat all!"

Opera singers are entitled to a 10 per cent. increase in salary when the performances are broadcast by radio, a Berlin court has decreed.

W. N. C. 1672

Achieve Production Of Synthetic Gasoline

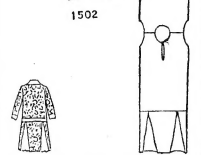

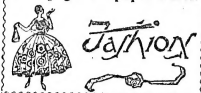

Method Has Been Discovered by French Engineers Is Reported

Synthetic production of gasoline on a commercial basis at two-thirds of the present cost is announced as achieved by two French engineers, Albert Prud'homme and Eugene Mondry. Development of their method was supervised by an engineer for the mines commission of the chamber of deputies and is declared to be of national interest.

A small plant is said to be actually extracting five gallons of gasoline, four of fuel oil, and valuable sulphur from a ton of lignite. There is estimated to be enough lignite available to supply France with gasoline by this method for 150 years.

The process consists in distilling lignite masses from which the various products are extracted by chemical processes already known. These processes, however, are modified by the introduction of metal particles which facilitate the chemical action to a degree hitherto unattainable.

An Attractive Frock for Many Occasions

This frock shows to special advantage the charm of combining two materials—to smart this season. The skirt has two pockets in front and two at the back and is gathered to a belt having a becoming round collar and long tight-fitting sleeves finished with trim cuffs. A narrow belt of the contrasting material completes this chic frock. No. 1502 is in sizes 8, 10, 12 and 14 years. Size 10 years requires 2½ yards 36-inch material for the dress, and 3½ yards 25-inch contrasting for pockets, collar, cuffs and belt. Price 29 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically, by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents two copies.

Many Homestead Entries

Yet further increases in homestead filings in Western Canada are already recorded for 1927. The number of homesteads filed in the month of January was 313, as compared with 276 in January, 1926, and increase of 67. Filings in Manitoba were 26, against 27; in Saskatchewan 150, as against 115; in Alberta 115, against 100, and in British Columbia 6 against 4.

Combating the Weed Pest

Aggressive Campaign by Farmers Would Stop Bringing About Mysterious Change

The world's greatest Teacher, in making applications of truth, referred to the flowers of the field, "how they grow; they toil not, neither do they spin." In Western Canada, its beautiful native flowers are being rapidly eliminated by cultivated fields, and much of the virgin beauty of the prairies is gone forever. In their place are here waving fields of grain, which, while not appealing so much to the aesthetic in man, does supply his daily wants.

In these vast fields, which are so much admired, there is a serious menace showing itself more and more each year. This is the weed pest. The farmer wants to get busy. He may judge by their proficiency. It certainly looks as though there were considerable toll ahead for the farmer if he hopes to combat the weed pest. Useful plants deplete the soil fast enough without having it done by weeds, which are almost useless to both man and beast, at least so far as is known at present.

What a short-sighted policy it looks to see so much of our grain fields taken up by weeds of various kinds. We believe present conditions can be vastly improved and the matter is entirely up to the farmers themselves. If they would band themselves together and formulate a live aggressive campaign, a year or so would see a marvellous change. When we realize how much good grain is crowded out by weed plants, the loss in yield, paying for wine and thrashing, and carrying to market that which in the end the farmers are docked for, surely good interest would be earned for the effort put forth. Better to get busy at once for each year you toil not in this matter, the stronger and more firmly entrenched becomes the enemy. Economists and others may tell our farmers about these things, but the farmers are the only one who are able to apply the remedy.

Chief Scout Celebrates Birthday

Sir Robert Baden-Powell, founder of the Boy Scout and Girl Guide movements, celebrated his 70th birthday recently which was also the birthday of his wife. Both are at present in South Africa. There are now 2,000,000 members of the organization which Sir Robert founded in 1908 "to promote good citizenship in rising generations."

Gambling Profitable for France

However costly it may have been to gamblers themselves, games of chance were profitable for the French Government during 1926. Receipts from the taxation of the casinos were 252,000,000 francs, or about \$10,500,000. This represents a huge increase over the previous year.

Veteran of Canadian Service

Mountie, the lead dog of the Chateau Frontenac huskie team, has seen five years active service with the famous Royal Canadian Mounted Police, in the far north. Four years ago he was brought from La Par, Manitoba, as lead dog for the team in Quebec.

Now in his old age he has every care and attention, eleven years of faithful service should have some recompense. This dog is almost human in every way, and particularly where age is concerned; this he realizes, and often asks in an impatient manner to be put into the bus. But

Big Trade With Russia

Soviet Republic Places Heavy Orders For Canadian Agricultural Machinery

Orders for agricultural implements placed in Canada by the Union of Soviet Socialist Republics (this year to date are already twice as large as those placed with Canadian firms for the whole of 1926. According to figures supplied by the U.S.S.R. Trade Delegation in Canada, enough now-ers have been bought here in the first six weeks of the present year to cut 21,000 acres per day for a twelvemonth haying season; enough binders were bought to cut 600,000,000 sheaves of grain from 42,750 acres—these binders, if stretched out with a yard space intervals would cover 6½ miles; while the mowers, placed abroad, would mow 500,000 acres. 3,000 horses will be required to draw these machines. Binder twine brought by the delegation, in the period mentioned, runs to 5,000,000 lbs. or just half of Canada's total exports to all countries in 1926. Incidentally, the delegation points out that while, before the revolution only 500 tractors were in use in what was then known as the Russian Empire, some 20,000 are now being operated in the same territory.

Western Hay for China

Two Hundred Tons of Alfalfa Shipped to the Orient

Two hundred tons of alfalfa hay were shipped recently from the Lethbridge, Alberta district for China—its first shipment of Canadian hay to that country so far as is known. The hay was moved to the Pacific coast in a special C.P.R. through freight of 29 cars and was loaded at Vancouver on the Blue Line Tyndarous for Hong Kong.

The order for the large shipment was received by W. C. MacKenzie, manager of the Southern Alberta Co-operative Association from the British government agricultural department, London. It is thought that possibly the hurried order was brought about by the war in China and the concentration of British emergency troops in the disturbed area.

Only No. 1 well baled hay was sent in the hope that the shipment will be the opening of a large trade with the Far East.

Punishing Profiteers

Profiteering grocers are being punished in a new way by the Paris police, who forbid them to make their usual sidewalk display of goods for varying periods. When sentencing offenders to withdraw their wares from the sidewalks the Prefect stated: "Your customers will know why you have no display, and they will know they will do well not to patronize you."

A clock keeps right on working when it goes on a strike; that's where it gets the bulge on a man.

Government Action Is Urged To Protect the High Standard Of Canadian Seed Wheat

Scotchman Built First Reaper

Presbyterian Minister Worked Out Idea Hundred Years Ago

Celebration of the centenary of the creation of the first practical reaping machine is coming soon and its date may surprise those who view modern farm machinery as of this inventive age. Of course, it was really so late as 1877 that the reaper began its grand career, though Cyrus McCormick's first appeared in 1831. One John Connon had once produced a mechanical one. The real start of the wonder machine that was the father of all present power reapers was in the brain of Rev. Patrick Bell, a Presbyterian minister of Carnhill, Fifeshire, Scotland. He built the first efficient reaping machine in his spare time—and his odd hours were few. Reaped harvests will be done to his invention.

Rev. Patrick Bell was a farmer's son, and though he early headed for the ministry, he was never so absorbed in theology that he did not recognize the need for a machine that would take off the farmers' shoulders the labor of harvesting grain by processes dating back to prehistoric times. As a youth he experimented, and after he had passed into the ministry and was pitting his perdition to his terrified flock on the Sabbath, week days he continued to study this agricultural problem, resulting in the successful building of a reaper in 1826. It operated a series of scissors fastened on the "knife-board."

However, McCormick's superior mechanism and the superior driving power put behind the United States invention prevented the Scotchman from profiting as fully as he should. But neither Carnhill nor Scotland as a whole has quite forgotten the inventive minister, and the ceremonies of the coming summer will be held both in his own village and in St. Giles' Cathedral, Edinburgh, where thanks will be given for the inspiration that advanced so greatly the interests of an agricultural population.

Capital for Northern Development

Proposed Paper Mill on Nelson River Would Use Hudson Bay Route

Application for a timber limit of 11,000,000 cords in the Nelson basin, which has been made to the federal government, forebodes construction of a 600-ton power mill at White Mud Falls, on the Nelson River, and shipment of the mill's newsprint product to Europe by the Hudson Bay route. The International Paper company, according to reliable information received in Winnipeg, is behind the development project. The expected completion of the Hudson Bay railroad this year is understood to have been one of the important factors in deciding to go ahead with the \$20,000,000 scheme.

Favorable results from the Flin Flon are tests have made the development of a northern power site essential. It is understood, and a power mill at White Mud has long been considered a necessity to round out the undertaking and share the big capital cost of the development of the power site. Horse-power at the White Mud site is estimated at 162,000—Manitoba Press Press.

Diversified Farming

Alberta Farmers Getting Away From Straight Wheat Growing

Alberta, formerly almost 100 per cent. straight wheat raising country, has changed radically in this respect in the last fifteen years, and although the wheat yield in the province in 1926 was 113,600,000 bushels, this represented only 45 per cent. of the value of the agricultural products, which totaled \$261,000,000—the greatest in the history of Alberta. Poultry crops are climbing rapidly in the percentage table of values, being now 21 per cent., while dairy products are now 8½ per cent.

Fish dried by electrical hydrating plants, it is said, may be kept for years. It is easier to dodge responsibility than it is to dodge the result.

The "Doctor" I met yesterday thought only of making money. "She" "Well, don't stop now. Father hasn't as much money as you thought."

Action to Amend the Dominion Seed Act, to protect the grade of Canadian wheat, has been taken by the agricultural committee of the House of Commons, which it recommended that the act be amended to give the Minister of Agriculture the right to refuse a license for the sale of new varieties of wheat for seed purposes until the quality of the new variety has been passed on.

A resolution passed by the committee recommends that the Minister be given the right to refer applications for distribution of new varieties of seed to a board, consisting of the seed commission, the Dominion cerealists, a representative from the Canadian Seed Growers' Association, a representative of the provincial seed board of the province in which the application originated, and a representative of the wheat trade. It was also urged that the Minister have power to revoke any license already granted for a new variety of wheat, upon recommendation of the board mentioned.

Hon. W. R. Millerwell approved the resolution and assured the committee that legislation would be prepared covering it.

E. J. Garland, Bow River, thought that agriculturists were in danger of being lashed out of business. A person buying seed wheat should be protected, but it should not be made almost impossible for a farmer to experiment with the growth of new varieties of wheat.

Hon. S. F. Tisdale, Victoria, B.C., said that the high standard of Canadian wheat should be maintained by the strictest means. Every freedom should be given a farmer to try to develop new varieties, but full scope should not be allowed the "quack" growers to dump their products throughout the country without first proving the value of the variety.

Improvement in the Horse Industry

Increasing Demand Is Noted for Well Bred Horses

Despite the growth and development of the Dominion Department of motor power the live stock of Agriculture is able to report from year to year continual improvement in the horse industry and increasing demand. It is added particularly in the western provinces, horsemen are awakening to the fact that in order to meet the needs of future years, says the Dominion Minister of Agriculture in his report for the year ending March 31st last, they must begin breeding now, hence the steady increase of club members and increasing Federal Assistance Policy conducted by the Live Stock Branch. This policy encourages community breeding and enables breeders to obtain the services of the best and soundest horses at reasonable service fees. It also protects the stallion owner in that he is assured of a fair return on his investment. All stallions are subject to rigid inspection and, like, as the Minister pointed out, coupled with the use of good mares, together with better feeding, care and management of studs, dam and colts, is steadily and surely making for the improvement of Canadian horses.

Sugar Beet Outlook

Good Returns are Offered to Beet Growers in Southern Alberta

The Raymond sugar beet outlook is very encouraging at the present time and 8,000 acres will probably be planted this year. The company is anticipating a return of \$7 per ton for beets this year, which, on a 12 ton to the acre crop, will return a gross of \$84 an acre for the beets. In addition, the farmer receives the 25 cents from the pulp and the beet tops which, on a 12-ton to the acre crop are equal to one cutting of alfalfa hay in field value. He has, in addition, the beetashes or syrup remaining after the sugar has been extracted, which makes a wonderful stock feed.

Nearly Everyone Drives

There is an automobile for every 6.5 persons in Moose Jaw now, according to figures supplied by the Provincial Secretary. In the year 1926 there were 2,941 motor vehicles, as compared with 2,157 in 1925, and 2,666 in 1924. This is an increase of 36 per cent. over 1925, and 17 per cent. over 1924.

Alberta Coal Output

Figures of the Alberta Mines Branch show a total coal output in all fields of the province of 5,505,268 tons in 1926, as compared with 5,583,284 in 1925—the third largest in the history of the province, being exceeded in 1920 and 1922.

SPOHN'S
DISPENSER
COMPOUND

Keep your horses working with **SPOHN'S** Standard remedy for 25 years for Distemper, Strangles, Influenza, Coughs and Colds. Give to all your horses and you will give **SPOHN'S** for Dog Distemper. Sold by your druggist. If not order from us. Two sizes, large and small. Write for free literature.

SPORN MEDICAL CO. Dept. 25 CHINOOK, ALB.

WORLD HAPPENINGS BRIEFLY TOLD

The French court of revision, the highest court of the country, has ruled that pedestrians are subject to traffic rules like vehicles.

The discovery of a new star of the twelfth magnitude has been announced at Carrow. It was discovered by Assistant Professor Casimir Kordel, of Carrow University.

Mrs. Amanda Riel, sister-in-law of Louis Riel, famous rebel, is dead at Winnipeg. Mrs. Riel died on a street car from heart disease. She was born in St. Boniface, 25 years ago.

The United States has definitely proposed to Great Britain and Japan a three-power naval limitation conference to meet in Geneva not earlier than June 1.

Thomas P. Dawson, 60, who attained international prominence during the Great War for his relief work in Belgium as an associate of Herbert Hoover, died recently in Providence, R.I.

The Dominion Government's ice breaker, the *Stentor*, has entered the Halifax drydock for a thorough overhauling and refitting preparatory to a voyage to Hudson Bay on survey work.

Opening of the new United States legation at Ottawa may have to be deferred until after July 1, because there are no funds for that purpose, due to the fact that congress failed to enact the deficiency appropriation.

The Royal Air Force is planning an attempt to break the world's distance flight in a non-stop, non-stop run. A powerful plane is to start from Cranwell, Lincolnshire, and fly in the direction of British India as far as its fuel and other equipment will permit.

The Canadian Government has been invited to send a delegation to a world agriculture congress called by the Italian Government to convene at Rome, April 25 next. The Department of Agriculture stated it was unlikely that Canada would be represented.

Honored the Dairy Cow

It is customary to christen a vessel before it leaves on its maiden voyage with champagne but recently one of the largest vessels on the Great Lakes was christened with milk as it was launched from the Manitowishippi ship building yards. This is certainly doing honor to the dairy cow. Farmer's Advocate.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is mild.

In the last ten years, 5,000 parasites have been granted American women, more than the total for 100 years previous.

The master it is to render a man the attorney you'll have to do it.

Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Dr. J. C. Fletcher's *Castoria* has been in use for over 25 years to relieve babies and children of Constipation, Flatulency, Wind, Colic and Feverishness, afflicting Everlasting ailments, and, by receding the Stomach and Bowels, aids the assimilation of food, giving natural sleep without opium.

The genuine has signature of *Dr. J. C. Fletcher*.

W. N. C. 1672

Airmen Ready for Task

France May Bring Ashes of Napoleon's Son to Paris

The French imagination has been fired by the proposal to bring the ashes of the little nephew of Napoleon, Napoleon's son, from Vienna to Paris to rest beside the tomb of Napoleon under the great dome of the Invalides.

If a decision is reached in answer to the national demand aroused by the proposal of General Maréchal, commander of the Invalides, two of France's greatest airmen are ready to bring the remains to Paris.

Clifford Harroon's organization, the old time flyers, known as "Violet Tigers," hail the idea, and have named Pelletier Dolsy, hero of the Paris-Tokyo flight, and Sadi Lecoq, hero of innumerable air exploits, for the task.

According to information from Vienna, Austria's republican government will not hinder the removal of the ashes of the "Duke of Reichstadt," leaving the matter entirely in the hands of the Hapsburgs.

Had Terrible Headaches and Was Unable to Sleep

Saskatchewan Man Used Dodd's Kidney Pills With Great Success

Mr. N. Zilan Was Relieved of His Trouble After Taking Short Course of Dodd's Kidney Pills.

Laventure, Sask. (special) — "I want to tell you just what your Dodd's Kidney Pills have done for me," writes Mr. N. Zilan, a resident of this place. "I had terrible headaches and could not sleep but after taking two boxes of Dodd's Kidney Pills I commenced to feel fine. I cannot praise this kidney medicine enough and would not be without it in my house."

Persistent headaches and sleeplessness can usually be attributed to a run down and exhausted condition. Other symptoms such as irritability, tired languid feeling, depression and loss of energy are also the outcome of this condition. It is therefore necessary that you take a few weeks' treatment of Dodd's Kidney Pills to restore vitality and generally tune up the nervous system.

Burglary Was Unusual

An unusual burglary took place in England recently, when thieves broke into the surgery of H. Chopin, an Hford dentist. They made a selection of 7,000 front and back teeth, and then one of them, comfortably enclosed in the operating chair, proceeded to sort them out, putting aside for removal those which were gold plated. The rejected dentures were scattered all over the floor.

HEADACHE, COLDS, COSTIVE BOWELS, TAKE "CASCARETS"

To-night! Clean your bowels and end Headaches, Colds, Sour Stomach

Get a 10-cent box now. You men and women who can't get feeling right, who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are irritable, nervous and upset, bothered with a sick, easy, disturbed stomach, or have a bad cold.

Are you keeping your bowels clean with *Cascarets*, or have you a pass-around every few days with salts, cathartic pills or castor oil?

Cascarets work while you sleep, relieve the stomach, clear the bowels, undigested, fermenting food and foul gases; take the excess bile from the liver and clear the entire system of the accumulated waste matter and poison in the bowels.

A *Cascaret* tonight will straighten you out by morning. A 10-cent box from any drug store will keep your stomach sweet, clear and bowels regular, and, best of all, for months. Don't forget the children. They love *Cascarets* because they taste good and never gripe or sicken.

Helping New Canadians

There can be no more public spirit or work incentive than that of making the foreigners in our midst good Canadian citizens. If a helping hand is not held out to them, if they are not taught the principles of our government and inculcated with the spirit of Canadian institutions, then instead of being an asset to Canada they become a menace. London Free Press.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of discomfort, and if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powder, which are safe death to worms.

They men are seldom afflicted with fits of melancholy.

(Minard's—the dependable liniment.

SUNDAY SCHOOL LESSON

MARCH 29

THE CHRISTIAN'S HOPE

Golden Text: In my father's house are many mansions; if it were not so, I would have told you, for I go to prepare a place for you. John 14:2.

Lesson: John 14:1-2; 2 Corinthians 5:1-10; 1 John 3:2, 3.

Devotional Reading: Revelation 21:1-3.

Explanations and Comments

1. The Promise of Christ, John 14:2.

"Let not your heart trouble; he who is in God, believe also in Me."

"Twas the Master himself who said it."

To the sorrowful little band, Facing an hour of darkness, That they could not understand."

"In my Father's house are many mansions," thus Jesus comforted them. Our word "mansion" meant originally merely a place of shelter, and accordingly the margin of the Revised Version has the word "abiding place."

In speaking of his own death, Jesus said, "I go away." "I go to the Father." So Paul said, "The time of my departure is at hand." "They were travellers, setting forth on a journey to a better country, So Christ would have us think, not that we are going to die, but that we are going to set forth on a journey that ends at our Father's house."

"If it were not so, I would have told you," in the minds of all peoples there is a belief in a future life. This belief, Jesus' words tell us, is true, for otherwise he would have distinguished the minds of his followers.

"I thank thee, O Father, that there is a voice within me which contradicts the absence of death," George Matheson.

Might Have Been Worse

During a certain election campaign a candidate in a notorious constituency waxed wrath over some stories about him that appeared in the local paper, and excitedly entered the same town of the editor. "Look here," he cried. "What do you mean by printing all that stuff about me?" "Well," the editor without showing any signs of perturbation, "What's the matter with it?" "I'm a little bit perturbed," replied the candidate. "Why, it's all lies and you know it?" "Well, then, what are you complaining about?" asked the editor with a smile. "How would you like it if we had told the truth about you?"

Something New in Russia

Have Just Discovered a New Range of Mountains

The Godwin and Sushnet of Russia has announced that a new and mighty chain of mountains had been discovered in the Yakutsk expeditions headed by Professor Obrutchev, a geologist.

The mountains are located along the Indigirka River. The new range is described as more than 1,000 miles in length, 200 miles wide, with many of the peaks 11,000 feet high.

The range probably will be named after Lenin, the late premier.

The Oil of the People. Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its strong qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

On any given day there are on the seas, counting only the value of ships alone, 5,000 tons and the cargoes borne, no less than 2,500,000,000 worth of trade under the British flag.

Tallest Man in Smallest Country. The tallest man in the world came from the smallest country in the world. In the tiny republic of Andorra lives Jose Fontes, who is 10 feet 6 inches tall. Growth, according to Biblical experts, was only 19 inches taller than this, but Jose may yet reach that mark, for he is only 19 and still growing.

Stands a Poor Chance. The New York Central railroad has placed in service the largest locomotive on its rails. It is 88 feet long and weighs 552,000 pounds—and the Detroit Free Press says, a reckless automobile driver probably can't even deny it.

One upon a time, is the way babies begin, and after a man goes out once upon a time he begins to tell his wife babies.

For Sore Throat

Rob throat and clear with Vicks VapoRus. Its double direct action (killed and absorbed) brings welcome relief.

VICKS VAPORUS

GIN PILLS

FOR THE KIDNEYS

THE WORLD'S BEST REMEDY FOR ALL KIDNEY AND BLADDER TROUBLES

The quickest and most effective relief from Lame Back and all Kidney and Bladder Troubles is Gin Pills. They promote health by restoring the kidneys to their normal action of filtering the poisons from the blood.

Women of Canada Pay Striking Tribute to Aluminum — — the Modern Metal

FROM Windsor, Ontario, to Hudson's Bay, from Halifax to the Rockies, RED ROSE TEA within the last few weeks has scored an extraordinary increase in sales.

It is because we have stopped using paper packages, and are again packing this finest of teas in the old, familiar Aluminum package of years ago.

The reception it has been given demonstrates beyond all doubt that housewives of Canada recognize Aluminum as the perfect container.

For more than thirty years we have been experimenting with packages — trying lead, paper and Aluminum — seeking always a material that would protect and be worthy of Red Rose quality.

But it was only after Red Rose has been offered to the public in all these packages—first lead, then Aluminum, then paper—that the great advantages of Aluminum were proven.

Aluminum keeps out moisture, preserves the flavor and protects the quality. Paper packages, on the contrary, absorb moisture which occasionally impairs the quality.

So now and in the future RED ROSE TEA will be packed in the Aluminum package, as it was in years gone by.

A Tribute to Britain

Dissep Manning of New York Praises Qualities Which Characterize Empire

That was a noble and splendid tribute paid by Dissep Manning of New York to the British people and to the King and Queen on the occasion of the presentation of a silver salish dish, the gift of King George to the Cathedral of St. John the Divine, now in course of erection. Sir Esme Howard, the British Ambassador, declared it to be the King's hope that the dish would be accepted and preserved as a further reminder of the chain of friendship between the United States and the British Commonwealth. Accepting the gift, Dissep Manning declared that the United States must stand with Great Britain and the other nations of the world and bear its just share of world responsibility. Speaking of the gift, he declared that the dish would be preserved as a further reminder of the chain of friendship between the United States and the British Commonwealth.

"In closing, let me say that with as much as with individuals, it is character that is the supreme factor. It is for their spirit and character as a people that we honor our British friends. We honor them for their love of liberty, for their high sense of responsibility, for their loyalty to the principles of justice, of righteousness and of religion. And on this occasion I may be permitted to say that we as Americans must nobly imitate in the lives of His Majesty King George and his gracious and beloved consort, Queen Mary, in difficult days, they have borne their part. A way which has won the respect and admiration of the world. Their greatest influence has been used for the highest standards of human life, for the sacredness and permanence of marriage and the home, for duty and righteousness and religion.

We are proud to receive the gift from His Majesty, the King of Great Britain, and we are still more proud to receive it from such a sovereign and such a man as King George V. has shown himself."

Chicago Professor is Worried

Afraid U.S. Will be Over-Populated in Year 2000

The Malthusian fear which war and disease checked is worrying scientists at the University of Chicago. Prof. H. H. Barrows, the director of the Hamilton Club, has written an address to the club with the title "The Malthusian Fear," in which he says that the world's population will be 25,000,000,000 in the year 2000. That is only 74 years away. What to do with them is the problem the anxious professor put.

The whole country will be crowded like sardines in a can. The population may spread over the land and reach the Alaska and Western Canada. The continental United States, from the Gulf of Mexico to the Arctic Ocean, cannot live like China.

"I can't see how China, America, or even the world, will be able to support their population," said Prof. Barrows. "I, for one, am not depressed to learn that population is advancing by leaps and bounds."

The increasing population has "gone through the natural resources of the United States like a hoard of destructive grasshoppers," Prof. Barrows declared. "Water power is not being properly utilized, resulting in a vast loss of 11,000,000 tons annually, soil is being washed away, and the land is being degraded by erosion. Millions of dollars have been required to build plants to clean them out, and the water is being polluted. Down these rivers as fast as they are grown, vegetable rivers of oil are being lost by evaporation and incineration. "The resources of the future will be the most serious problem in the history of the world."

Purchase Backing Horses

One of the fastest backing horses ever registered in Alberta was captured recently when Peter Welch, of the state of backing horses, owned by Roy Knight, of Baymond, and the "top" horses of the state owned by Peter Laganor of Dunbar, and Dick Gossard of Chumby. The horses were captured at the pick of the outfit horses of Western Canada.

When the large white horse used in a capture race held in 1775 in Vermont was captured recently during the capture of the highway, the capture was held in the history.

Professor of the bank just captured the top of your head. Forty bucks.

Professor. Not so lucky. It hit the third floor.

Indians Still Observe Ancient Rites

Alert Day Settlement Undisturbed by Advance of Civilization

While the Indian aborigines of British Columbia have, in many instances, adopted the manners and customs of the white men, their burial ceremonies in the form of their burials still retain many of the features of other days.

Alert Day, one of the few coast Indian settlements that have been left undisturbed by the advance of civilization, witnessed recently the funeral of a prominent Indian woman which bore the trappings of savage pomp and splendor.

The funeral was held to the accompaniment of the means of paid mourners and the grave covered by a canopy of white cotton cloth. Below this was a large pile of phase set on a frame which covered a beautiful display of flowers. These were spread over an ancient ceremonial robe, embroidered with pearl buttons and elk teeth. All the most prized possessions of the dead were placed in the vicinity of the grave. Clothes and boots were ranged in orderly fashion near the head of the grave, while a trunk on the side was set as a small photograph, covered by a scalloped cloth, was placed at the foot of it. On dishes placed nearby was food for the use of the departed spirit in the happy hunting ground.

Alert Day Indians have their masonry house and nearly all of them have embraced a nominal Christianity, yet in their burial customs they appear to have clung to their ancient pagan ritual.

Woman Holds Queer Title

Is Named as Chiroprapist to King George V.

Of all the queer titles with which this cosmopolitan capital abounds, is one lately bestowed on a young London woman. Her official title is "Chiroprapist to King George V."

The list of tradesmen who hold warrants of appointment to King George, Queen Mary and the Prince of Wales is published at the beginning of each year. This list shows that some curious professions receive royal patronage.

Holders of warrants to the King include naturalists, firm of philatelists, a taxidermist, a chiroprapist (Miss Kelly), a monumental sculptor, several makers of kilts and tartans, and purveyors of many kinds.

Tradesmen who hold warrants of appointment to Queen Mary include manufacturers of books and presses, a chiroprapist, invalid furniture makers and pin manufacturers.

Holders of the Royal Warrant are allowed to display the Royal Coat of Arms on their business premises and stationery.

What a "Milliard" Is

Few People Can Realize What a Thousand Millions Means

The word milliard, meaning a thousand millions, has been anglicized since the war, and its use has been made familiar by reason of fantastic, inductions and of national debts. The *Manchester Guardian* asks: How many people have imagination enough to realize what it really means? One of the simplest and most impressive illustrations of what it means is that only one milliard minutes have passed since the birth of Christ.

Withdraw French Troops

Another measure calculated further to harmonize Franco-German relations was announced, with a recommendation by Swiss Valley governing examination that the French force of occupation be evacuated from that territory and replaced by an international railway defense corps. The recommendation is signed by George Washington Stephens, of Montreal, whose resignation from the post of director of the governing commission was announced previously.

Quantities of Sugar and Salt Used

In the preserving of Canadian vegetables for commercial sale, nearly 100 tons of salt are used each year, and in fruit preserving nearly 3,000 tons of sugar. This is in addition to the vast quantities used up in the old-fashioned way on the kitchen range, and the National Intelligence Service of the Department of the Interior.

Crime in United States

Crime costs the United States at least \$100,000,000 a year it is estimated by Mark O. Premis in the *Atlantic*. Beyond this cost, more includes criminal fraud, loss of property, cost of law enforcement and economic waste without account of arrest and punishing factors.

Consider the fish. He never gets hooked as long as he keeps his mouth shut.

Improvement In Sheep Breeding

Pure Bred Ram Premium Policy is Proving Popular

Of the several policies brought into effect in recent years by the Live Stock Branch at Ottawa one that is proving of the greatest interest and value is that known as the pure bred ram premium policy. In the year ending March 31, 1926, a total of 1008 applications for first premiums and 182 applications for second premiums were approved. As a result of the policy since 1915 there has been a vast increase in the volume of well-bred lambs marketed in Canada and shipped abroad.

Another way in which increase of interest and progress of improvement in the sheep industry is marked is in the organization of pure-bred ram clubs. Farmers in a community agree to purchase twenty-five or more pure-bred rams of one breed and when sufficient orders have been obtained the club appoints a purchaser delegate to make the selections, do the buying, and supervise the distribution of the rams to members. The success of this part of the policy is especially indicated by the yearly increase of clubs and by the satisfaction shown by the applications for replacements by clubs that have been in existence for years. Forty-one new clubs were organized and 1628 rams landed in the year here referred to lambs marketed by the clubs have shown superior quality and command of the best prices.

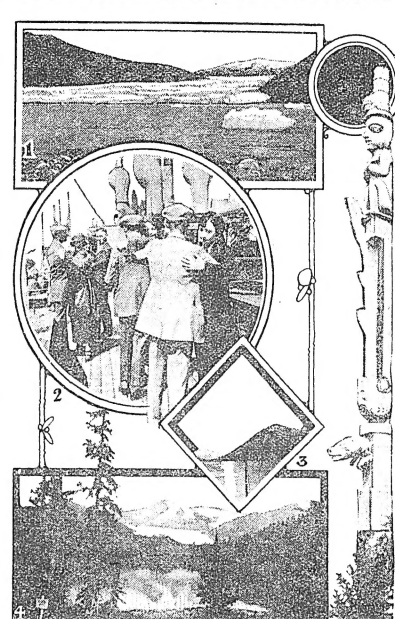

Farmers in the clubs, points out the Dominion Live Stock Commissioner, continue to keep a number of the ewe lambs for breeding purposes, with the result that the ewe lambs are showing a decided improvement in quality of fleeces. In fact, the commissioner adds, it will be only a matter of time until such ewes will be entirely replaced by ewes that are progeny of pure-bred rams.

Canada's Greatest Dairy Concern

Regina has been elected headquarters of what is said to be the greatest dairy business in Canada when the Saskatchewan Co-operative Creameries and the Candler Creameries amalgamated, March 1st. Fifty-five plants are involved in the merger and the fixed assets of the two concerns total more than \$2,000,000.

Ostrich feathers are plucked every seven months and as the birds often live to the age of 50 years, ostrich farms are profitable.

ALASKA--THE ENCHANTRESS

Nature being a capricious female, note so that the average does not faint all her fibers where it is to be seen most readily. If you want to see her gayest points you have to hunt for them, and that is why some of the most scenery on earth is to be found in the least accessible spots. One such spot is Alaska, though it is no longer inaccessible. The Canadian National Steamships, with their fleet of palatial oil-burner steamers, have overcome that handicap and Alaska can be reached today as readily and as pleasantly as any spot on the continent. The long days and the air of romance that still clings to its name, have combined to make the Vancou-

Vastness of Agricultural Publication

Every Phase of Agricultural Interest is Covered by Government Bulletins

Haphazard farming has passed out and intelligent thought and study has taken its place. Possibly there is no better indication of this fact than the ever increasing demand for agricultural publications. A proof of this is found in the report of the Minister of Agriculture for the year ending March 31st last. It is there stated that in the one year the increased demand over the previous year was 25 per cent, and that in all the vast amount of nearly three and a half million copies of bulletins, pamphlets and reports had been distributed. In addition to the printed publications, 755,001 unprinted pamphlets were circulated compared with 700,509 in 1921-22. In light of these facts it is easy to understand that, as the Minister states, the Dominion Department of Agriculture is by far the largest publisher in the commercial service.

Each year the Department issues scores of publications that, ranging from, are currently sought after by farmers, gardeners, specialists and book-vend cultivators. Every phase of agricultural interest is dealt with in the publications, of which there are over 250, and that can be had for a small fee of cost. Lists can always be obtained by application to the Publications Branch.

Chinook Now Dead Language

Was Once Spoken by Over Hundred Thousand Persons

Chinook, which has served as a sort of lingua franca between the Indian tribes and white traders of the Pacific Northwest and which has left many place-names in the Vancouver territory, is a dead language now, according to Edward Harper Thomas, of Seattle, who is an authority on Indian languages and dialects.

At one time in the history of this continent Chinook was spoken by more than one hundred thousand persons in their every day relations and intercourse.

The word "Chinook" is of Indian origin, taken from "Chinook" meaning little child.

Every time a girl goes interested in a novel the heroine reminds her of herself.

Alaska is the only country in Europe without railways.

Women Amazons of England's Factories

Those Employed in Chemical Works Show Surprising Strength

Some surprising details of the comparative physical strength of women in factories and the modern college girl were given by Professor P. Cathcart, Gardner Professor of Chemical Physiology at Glasgow University, in a lecture at the Royal Institution of Great Britain, Piccadilly, W.

In investigations made by the Medical Research Council, at the request of the Home Secretary, to determine the load that can be comfortably carried by an average woman, it was found that the heaviest work done by women was at a chemical works at Glasgow and a brick works in the Midlands. Professor Cathcart said:

"In the chemical works the girls employed were literally remarkable for their physique and the error of their carriage. They all worked barefooted and carried out their various operations with greatest skill and ease. The astonishing thing was that most of these perfect young women were born and bred in one of the worst districts of Glasgow. We saw one woman who had shouldered 20 to 25 tons of raw material to a height of two and a half feet in a day.

"In the case of the brickworks the work done was also very heavy. Although the girls were allowed to select their own load they carried as a rule more than 100 pounds a distance of 70 to 80 yards while women who had barrows had normal loads of from four to four and a half cwt. One woman was found who moved 25 tons of material in a day, yet the good carriage of the women was noteworthy.

Girls, said Professor Cathcart, reach their maximum strength at 18, but unemployed girls in football groups were found to be of definitely smaller stature.

Girls at a college were found to be of greater height, weight and strength than either factory or unemployed girls, but could not compare in strength with the girls employed at the chemical works.

Has Faith in Canada

President Beatty of the C.P.R. Has Confidence in Future of Dominion

Addressing the Chamber of Commerce at Three Rivers, Que., E. W. Beatty, chairman and president of the Canadian Pacific Railway, summarized the factors "which should make us all very proud and very confident of Canada," and added to these a short summary of the needs of the Dominion.

The factors that had built up the country and which inspired confidence in its future were, said Mr. Beatty, first, a good system of democratic government, and second, "a people noted for their level view of things, their lack of hysteria and their sanity in viewing and grappling with their own problems. These natural characteristics are backed by great resources heretofore undeveloped, and while it is probably scarcely necessary for me to reiterate what no doubt has already been stated, it is only proper that I should indicate what the sources of our future wealth are."

These were, he pointed out, natural resources including the world's finest wheat and vast areas of equally good arable land as yet untouched by the plow, unlimited water power, forest wealth and mineral possibilities, the possibilities of which were very great. Finally, he pointed to the growing of climate in this connection, he pointed a glowing picture of the value to Canada of their climate. "The clear, stimulating air of northern countries is not without its effect on the physical and mental attributes of the people of the continent," he said. "It is healthful qualities are a source of wealth. The country with which I am concerned has been emphasized in many ways in its great advantage both the country's climate and its energy and its this, as in other things, one of the best of its value in importance lies in the appreciation of those who do not have it to their own advantage."

Was Paying the Price

A recent visitor to an English prison discovered among the inmates a man whose he knew. This particular prisoner had been finally told by the heads for swimming, though for quite a time he had not a large figure in English public life. But there he was making calls.

The visitor went up to him and said: "Why how do you do, Mr. Brown?" What are you doing now?"

"No, nothing."

Wilson: "Did the minister say anything when you got married?" Brown: "No, and neither did I."

An Aid To Logging Industry

Gas Motive Power Gaining Favor in British Columbia

The logging industry of British Columbia is being revolutionized by gas motive power, and is rapidly replacing the logging engine and horse.

On the Pacific Coast, in the days before the gas engine, little log hauling was done by truck. There were several reasons. Trucks, in order to haul the mighty tree trunks, had to be of such solid construction that even when empty one of them was a pretty good load for a team. Good hauling roads were scarce, and as it took more than one team to haul a log load, truck hauling was costly. It was a good deal easier and less expensive to build sled roads, grease them well and drag logs along them in "trains." That is, a dozen or so coupled end to end in a single line.

East of the Cascade mountains and in the pine country generally wagon and truck played a greater part in the transportation problem of the woods. This was owing to the trees being smaller, the logs being shorter and weighing less. But even there most of the hauling was done in winter by sled when snow covered the ground.

When gas trucks appeared, experiments were made with a view to fitting them into the log hauling problem, both over paved and unpaved roads. The result has been a type of truck especially suited to this kind of work. Now truck logging is a recognized and extensive branch of the logging industry. By the help of gas logging trucks, operators of small mills have been able to log off isolated patches of timber owned by farmers or other private individuals that otherwise would have not been considered as timber tracts, and find a profitable market for the timber.

Logging authorities believe that in future gas trucks will do much of the work that is now done by locomotives. As lands are to be logged grow more rugged and precipitous through the march of the logging camps towards the mountains in search of stumps, but show also the good points in other eras. The temptation will always be to use the rough roads and motor trucks rather than build railroads and operate costly locomotives.

Changes Program of Religious Teaching

Kemalist Government Working to Get Religious Tolerance

Turkey is quietly teaching itself a lesson in religious tolerance. Though the orders have not been advertised it has become known that the government has instructed all Turkish public school directors to carry out a program of religious teaching which will not shirk the Moslem religious about all others, but show also the good points in other eras.

Under the Sultans all the public schools were conducted by priests whose instruction consisted almost entirely of Koranic precepts. The new order of the Kemalist government is looked upon as implying a plea of a principle inherent in the Moslem religion, namely, the recognition, by Muhammad himself, of Moses and Christ as prophets whose words should be heeded.

Treated With Artificial Sunlight

Violet Ray Pool Has Been Opened in Paris

The most curious bathing beach in the world has been opened in a basement in downtown Paris.

It is known as the "Radiological Institute" and is the first step in Paris' attack on the serious increase of rickets and tuberculosis among children. This increase is due to the lack of violet rays in the Parisian sunshine.

Under the glare of great mercury lamps dozens of poor children, instead of a pile of games, play all day long in the white and bordering an artificial pond. The walls are lined with aluminum, so that none of the better rays is lost.

Not the Same Man

A colored man was charged with talking whiskey illegally.

"What's your name?" roared the court.

"Joshua."

"And your other name?"

"That's all, sah—jest Joshua."

The judge eyed the prisoner a few moments and roared again.

"Are you the Joshua who made the sun stand still?"

"So, sah? For de Joshua who made de sun stand still?"

"No, sah. I be a marvelous de-

mon, sah. I be a marvelous de-

mon, sah. I be a marvelous de-

Canadian Farmer Tells His Experience

"Les" Booth, widely known Ontario farmer, and a sick man for 20 years, suffered daily, only half alive. Now strong, robust, vigorous, credits new formula to Tanlac

"Though popularly known as 'Les,' Mr. Booth's correct first name is George. His home is at 2714 Perth St., Brockville, for the past three years he has enjoyed vigorous health but what he endured before then is best told in his own words. 'For twenty years my arms, shoulders, back and hips, ached with rheumatism,' said Mr. Booth. 'Often I had to quit work entirely and I remember one had spell that kept me in bed for six months.'

My case got to be so chronic that the help ran the farm. I was practically helpless. Even my wrists and hands would swell up so that I could not write my name. I devoted bedtime for I got no rest, but lay there in agony, waiting for morning. Nervous spells would seize me and I would tremble all over like a leaf. I couldn't get any benefit from my food and had to lose myself to sleep. My weight was far below normal.

Three years ago I decided to give Tanlac a good trial, for nothing else had helped me. I could scarcely believe such results were possible as those Tanlac-men showed. The itching stopped, my appetite came back and I could eat heartily. My nights became more restful, too, and I slept

soundly. I gained 16 pounds which I still retain, and I now work hard outdoors from 8 to 10 hours a day. I never have an ache. It's hardly believable. If folks want to know what Tanlac can do, tell them to write to Les Booth, or to come and see me. I'll tell you."

If your health is broken from overwork or neglect, profit from Mr. Booth's experience. Try Tanlac, nature's own body builder, made from roots, herbs and barks. Your druggist has it. Over 32 million bottles sold.

Strange Romantic Love Adventures of the Happier you know

Joanna
by H. L. GATES
Copyright 1925 by H. L. GATES
Published by arrangement with First National Pictures, Inc.

CHAPTER XXX.—Continued

"That I wouldn't do," he declared promptly. "If you have any other reason than a sudden desire to enjoy my admirations without interruption, I don't want to know. I am in love of my vanity."

"Then you shall be flattered," she returned gaily. "I am in the mood for you. Someday there's got to be a battle between us, between you and me, Roddy. Let's have it now."

He was on his feet in an instant and standing over her. She stopped with her eyes, and held him half bent down to her. She did not stir, nor put up a hand; it was just the indescribable something in her eyes.

"No, not just now," she said, her lips shaping into the utmost of their provocativeness. "You must be too tired. But tonight, perhaps, or at the moment arrives. But as soon as we can, I want to know how I'm coming off."

"When you? Are you playing with me?"

No, Roddy. I've never played. Not since my money came. Someday I want to play. After we've had our battle, perhaps. What shall we do first? Let's go through the mist to some place. Why no up La Turbie?"

"Tonight?"

"Tonight. That's what I must hurry home to chance for. I shall want to look very attractive."

She stretched and looked down at her corset for a moment. She did not flick under her eyes, nor did her lips move. She turned away and looked out of the window. It was already darkening outside, and the

lights of Monte Carlo were vague pin points.

"If we drive carefully we can make it," he concluded. "I'll take the wheel myself. You won't be afraid to trust yourself with me, shall you?"

"That's what I want to find out, Roddy. So many people are skeptical of me, I want to know if they're right or wrong."

He laughed. "I shan't ask you to stay beyond the hour," he declared. "I'll need some time alone to try and figure you out. What's happened? Something big, I am certain."

She stopped with her eyes, and held him half bent down to her.

"Nothing," she answered him. "Nothing, that is, that wasn't expected."

A servant notified them that Madame's room had been brought to the door before either of them realized that the hour had flown. She had indeed Kenilworth to tell her some of the histories of the sons and sons which were shown about the room in which the tea had been served, and she was enthusiastic about them.

When she went out to her horse she found that the coach also had brought a mount. Kenilworth had not his approval. Joanna begged to be allowed to ride back to Annette alone, declaring her faith in the lights along the sea beach and her horse's instinct, but Kenilworth was firm.

"I should take you along my self," he explained. "But I shall wait a look at the car. It's a stiff climb to La Turbie. I always want to be satisfied about my brakes."

At Villa Annette, Joanna found Brandon awaiting her. "I have in mind myself to dine," he explained, "and no one seems to object. Perhaps you will go along for a tour or two at the Casino, afterwards. There won't be a crowd and we can drop in for an act at the theatre. You are coming to have other plans for the evening?"

"And so have I," she told him. "I'm going up La Turbie with Roddy. He's often wanted me to go up with him, and now I've promised."

"Sorry," she did not wait for the inevitable protest against climbing the narrow, winding road that ventured up the steep La Turbie mountain

to the isolated resort above La Turbie village, but tripped on up the stairs. Brandon looked after her. Even women who were careless seldom went up La Turbie to dine or dance at the famous roadhouse atop the hill, unless in groups. The poorest of the hidden rendezvous along the coast. It was, in some respects, also the most forbidding. One always went up La Turbie but one did not, customarily, talk about it. After he had stood for a time in deep reflection, Brandon went onto the Annette villa and greeted out into the dining room. Accompanied as he was to the Riviera he estimated the feat of it to his nostrils and his fingers. He appeared to gain from his conclusions, some definite satisfaction.

He summoned a servant and inquired if Madame's Contant was still occupied in her boudoir. The maid reported that her mistress was, and would not be down for some little time. "You may tell her," he ordered, "that I shall not be staying to dine, if she won't mind."

A half hour later, when he had dismissed the Annette car which had taken him back to Monte Carlo, Brandon summoned his valet and demanded that a suit of heavy coats be laid out for him. When the man had completed his master's orders:

"Go at once to the garage of the Italian in the Boulevard du Midi and ask for Antoine. If he is not at hand find out where he can be reached immediately. When you have him say that I want him to drive me as soon as he can be ready by the mountain. If he objects to the task, tell him the thicker the fog the heavier his purse will be, and that much more for his men. Be sure, however, that it is Antoine himself you find. Otherwise return quickly."

On her way to her own boudoir, Joanna stopped at Yvonne's. She noted a scene was particularly interesting at her evening's toilette. Her maids were flushed and nervous under the temper of their mistress. That they were having difficulties in placing her was evident from the litter of glittering gowns ingeniously tossed into heaps on the chaise longue, chairs and even tables. For a brief instant Joanna stood in the boudoir door, beneath the curtains that shut off Yvonne's sitting room; just long enough for her eyes to harden and narrow. Then she announced brightly that she would be going out with Kenilworth and that she hoped her running away would not interfere with any plans for the evening Yvonne might have made. Yvonne glared at her sharply. She concluded, however, that there had been nothing hidden in Joanna's tone. "I have no other plans than a run into the Casino, perhaps," she said.

"Betty Weymouth is having something or other tonight at her place, and I did promise that you and I would drop in, but that is not important. If you are running away by yourself I shan't trouble."

Joanna went over to the other woman and, stooping, lightly brushed her cheek with her lips. "Then I shan't be seeing you till tomorrow, then. It will be early, though, as I shan't be able to sleep with tomorrow night so close." She stopped again at the door as she went out, to say, as if it were an afterthought: "Tonight I'm going up La Turbie—with Roddy. It will be great fun on the mountain tonight."

Yvonne turned quickly, but the girl had dropped the curtains behind her. She waved both of her hands away, when they were down upon her with Joanna's departure, and sat quietly in a stupor. Presently she looked up to the mirror before her. She examined the reflection she saw there with an intent, abstract scrutiny.

From her face her gaze wandered to her throat, around which hung her most magnificent pearls, and then to her gown, she had chosen a thing of pink in orchid hues that had come

to the isolated resort above La Turbie village, but tripped on up the stairs. Brandon looked after her. Even women who were careless seldom went up La Turbie to dine or dance at the famous roadhouse atop the hill, unless in groups. The poorest of the hidden rendezvous along the coast. It was, in some respects, also the most forbidding. One always went up La Turbie but one did not, customarily, talk about it. After he had stood for a time in deep reflection, Brandon went onto the Annette villa and greeted out into the dining room. Accompanied as he was to the Riviera he estimated the feat of it to his nostrils and his fingers. He appeared to gain from his conclusions, some definite satisfaction.

He summoned a servant and inquired if Madame's Contant was still occupied in her boudoir. The maid reported that her mistress was, and would not be down for some little time. "You may tell her," he ordered, "that I shall not be staying to dine, if she won't mind."

A half hour later, when he had dismissed the Annette car which had taken him back to Monte Carlo, Brandon summoned his valet and demanded that a suit of heavy coats be laid out for him. When the man had completed his master's orders:

"Go at once to the garage of the Italian in the Boulevard du Midi and ask for Antoine. If he is not at hand find out where he can be reached immediately. When you have him say that I want him to drive me as soon as he can be ready by the mountain. If he objects to the task, tell him the thicker the fog the heavier his purse will be, and that much more for his men. Be sure, however, that it is Antoine himself you find. Otherwise return quickly."

On her way to her own boudoir, Joanna stopped at Yvonne's. She noted a scene was particularly interesting at her evening's toilette. Her maids were flushed and nervous under the temper of their mistress. That they were having difficulties in placing her was evident from the litter of glittering gowns ingeniously tossed into heaps on the chaise longue, chairs and even tables. For a brief instant Joanna stood in the boudoir door, beneath the curtains that shut off Yvonne's sitting room; just long enough for her eyes to harden and narrow. Yvonne glared at her sharply. She concluded, however, that there had been nothing hidden in Joanna's tone. "I have no other plans than a run into the Casino, perhaps," she said.

"Betty Weymouth is having something or other tonight at her place, and I did promise that you and I would drop in, but that is not important. If you are running away by yourself I shan't trouble."

Joanna went over to the other woman and, stooping, lightly brushed her cheek with her lips. "Then I shan't be seeing you till tomorrow, then. It will be early, though, as I shan't be able to sleep with tomorrow night so close." She stopped again at the door as she went out, to say, as if it were an afterthought: "Tonight I'm going up La Turbie—with Roddy. It will be great fun on the mountain tonight."

Yvonne turned quickly, but the girl had dropped the curtains behind her. She waved both of her hands away, when they were down upon her with Joanna's departure, and sat quietly in a stupor. Presently she looked up to the mirror before her. She examined the reflection she saw there with an intent, abstract scrutiny.

From her face her gaze wandered to her throat, around which hung her most magnificent pearls, and then to her gown, she had chosen a thing of pink in orchid hues that had come

to the isolated resort above La Turbie village, but tripped on up the stairs. Brandon looked after her. Even women who were careless seldom went up La Turbie to dine or dance at the famous roadhouse atop the hill, unless in groups. The poorest of the hidden rendezvous along the coast. It was, in some respects, also the most forbidding. One always went up La Turbie but one did not, customarily, talk about it. After he had stood for a time in deep reflection, Brandon went onto the Annette villa and greeted out into the dining room. Accompanied as he was to the Riviera he estimated the feat of it to his nostrils and his fingers. He appeared to gain from his conclusions, some definite satisfaction.

He summoned a servant and inquired if Madame's Contant was still occupied in her boudoir. The maid reported that her mistress was, and would not be down for some little time. "You may tell her," he ordered, "that I shall not be staying to dine, if she won't mind."

A half hour later, when he had dismissed the Annette car which had taken him back to Monte Carlo, Brandon summoned his valet and demanded that a suit of heavy coats be laid out for him. When the man had completed his master's orders:

"Go at once to the garage of the Italian in the Boulevard du Midi and ask for Antoine. If he is not at hand find out where he can be reached immediately. When you have him say that I want him to drive me as soon as he can be ready by the mountain. If he objects to the task, tell him the thicker the fog the heavier his purse will be, and that much more for his men. Be sure, however, that it is Antoine himself you find. Otherwise return quickly."

that day from her Paris counterpart. She shook her head, in response to her mental conclusions upon the ensemble the mirror reflected.

"You may take off the pearls," she commanded a maid, "and bring me diamonds. A lot of them. And I shall not wear this gown after all. It's too innocuous. The something in burgundy; bring that." As if to herself she added, in a murmur that neither maid could overhear:

"Thoroughly and diamonds. If I'm not mistaken that will do the trick."

(To Be Continued.)

Say Eskimos Came From France

Interesting Discovery Has Been Made by Canadian Geologists

Canadian geologists claim to have discovered that the Eskimo, now confined to the Arctic, originated in the South of France. This is one of the major successes of research made by Canadian scientists with the co-operation of the French Government during little more than a year, and carried out largely on French soil, which it is considered has justified the organization of the Canadian School of Prehistory, and has laid the foundation for more extensive explorations in this field, both in Canada and abroad.

The director of the Canadian School of Prehistory is Dr. Henry M. And, F.R.S.E., F.R.S.C., etc., noted Canadian scientist. Professor And's quarters, in an Ottawa Government building, are headquarters for the work.

Digging at a site in the Dordogne department, France, a party of enthusiastic Canadians recovered skulls, bones, weapons and various implements which leave no doubt of the origin of the Eskimo and which enlarge considerably on existing theories regarding the manner in which North America was first populated.

When there were no Great Lakes before Niagara Gorge was worn he bore the normal surface of the earth, when it was from 2,000 to 2,500 feet beneath a "sea" of snow and ice, that stretched as far South as New Jersey, prehistoric man followed the receding ice cap of Europe, northward to the border of the Arctic seas. Some remained to settle the northern countries, but the ancestors of the Eskimo followed the ice on, turning eastward across the northern rim of Europe and Asia and gradually came over the Behring Straits up to the northern Americas.

They went south then, spreading out over what is now Canada, but following the ice line back towards the pole again, when it also began to recede with the gradually warming of the earth.

Fortune Came Too Late
Stefan Sandu, one of Romania's best known burglars, is a millionaire. He received news of his good fortune while on his way to serve a 20-year prison term. He fell heir to £250,000, but through the death of a relative, but prison regulations prevent him from buying any prison comforts. The million and a half fortune represents only \$7,500 but by the time his term has been served compound interest will increase greatly Sandu's wealth.

Jerry "Have you ever thought seriously of marriage?"
Stranger "Yeah! Ever since the ceremony."

If a man doesn't know when to be silent he doesn't know when to speak.

Our Canadian Cabinet

Contains More Scotch Than Any Other Race, and Only One Englishman

Scotland now demands to be made a self-governing dominion, equal in status with the other dominions of the empire. This we gather from the monthly organ of the Scottish Home Rule Association, advocating, in Wilsonian phrase, "self-determination for Scotland." Incidentally it is pointed out that while Britain's cabinet has only two Scots out of 21 (the Earl of Balfour, and Sir John Gilmour), Canada's cabinet contains more Scots than any other rare there being eight Scots out of 18, and only one Englishman. Here is the racial constitution of Canada's cabinet as given in the Scottish publication:

W. L. Mackenzie King (Scottish).
J. A. Robb (Scottish).
C. A. Manning (English).
Ernest Lapointe (French).
J. C. Elbert (Scottish).
P. J. A. Cardin (French).
Charles Stewart (Scottish).
James Macdonald (Scottish).
Peter Homan (Irish).
Dr. J. H. King (Scottish).
Rochester Dandridge (French).
Fernand Rivest (French).
Laurien Cannon (French).
W. R. Mulholland (Irish English).
W. D. Eider (German).
P. J. Veniot (French).
J. E. Sinclair (Scottish).

—From the Montreal Herald.

A SIMPLE TREATMENT FOR CHILDREN'S COLDS

Cold in the head is very common at this time of year, especially in the very young. Sufferer of a cold is prone to lead to serious consequences. To relieve all congestion of the system, and cold in the head, a cold, whether in infants or adults, for the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotics or other harmful drugs they soothe the child's irritability, relieve its suffering and ensure convalescence. Baby's Own Tablets are without an equal for relieving indigestion, constipation and colds. They break up colds and simple fevers; promote healthy sleep and make the dreaded bedtime period easy. The Tablets are the one medicine that a mother can give her little ones with perfect safety as they are guaranteed free from injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

Who gives songs in the night.
Job xxxv. 10.

To weary hearts that rest on Thee,
The fondlest love is shown;
And Thou hast many hidden joys
And comforts for Thine own,
And fountains of reviving strength
The world has never known.

—T.H.M.

Any man can sing by day; but only he whose heart has been tuned by the gracious hand of Jehovah can sing in the darkness. The things of earth may satisfy for the moment of prosperity; but only the peace of God can give gladness in the darkness of adversity. God gives joy in sorrow; and when the sad one sings through his tears, then the Lord comes out to him, with new and more tender assurances, so that by his very hymn he is made more gladness. That which is born of trust rises into glory.

—William M. Taylor.

Found Queen's Tomb Empty
Dr. George A. Reiser, assistant professor of Psychology of Harvard University, opened the tomb containing the sarcophagi of Queen Herodias, mother of Cleopas, builder of the great pyramids, says an Egyptian Telegraph dispatch from Cairo. It was found that the sarcophagus was empty.

No man is truly good who is only good for the sake of praise.

Planning Airplane of Unprecedented Speed

Italian Engineers Hope to Evolve Entirely New Type

Application to aviation of the principles used in the shelling of Paris by the long range "Big Bertha" of the Germans is being studied by a group of the most prominent aeronautical engineers in Italy.

They hope to evolve an entirely new type of airplane of unprecedented speed. They think even possible for it to fly from Rome to Buenos Aires in ten hours.

Like the shells of the "Big Bertha," the projected plane is to fly at enormously high altitudes. A catapult start is to enable it quickly to soar to a height of 5,000 meters or more, after which its gigantic motors are expected to hurl it through the rarefied air at record speeds.

EXPERIMENTAL FARM NOTES

INCUBATION

Since the early hatched pullets supply most of the winter eggs it is very desirable to start the incubation period some time in March. The success or failure of the whole year's work may depend upon the efforts during the incubation season. If using the hens have the nests made so that they may be closed. The hen usually does better if she is allowed to be out only once per day to eat and drink. Grain and water should be plentiful when she is off. If the hen does not leave the nest to feed as soon as the nest is opened, she should be gently lifted to the floor. A dust bath of wood ashes or dust is a luxury to a broody hen and in addition she should be dusted occasionally with a reliable insect powder.

At the first signs of pipping, close the nest after making sure that the hen has full crop and a drink. Do not molest until the hatch is complete. Remove shell and unhatched egg after a reasonable time and leave hen and chicks on nest until all chicks are well dried. Remove to a clean coop and do not feed the chicks before they are 36 hours old. If the incubator is used follow the instructions of the manufacturer and use a machine that has a good reputation. Usually a cheap incubator is dear at any price.

The best place to run an incubator is in a basement or cellar if well ventilated. The temperature is usually more even and the eggs are not so liable to receive a serious jar. A little moisture in the atmosphere is an advantage. When hatching starts do not open the incubator for at least 24 hours. It will be necessary to turn the lamp down as soon as chicks begin to come out to allow for the heat arising from the chicks.

Owner.—I say, can you drive a car?
Stranger.—No, boss.
"Splendid Fellow; then stay here and mind my car for a little while, will you?"—Passing Show

ALL CAN HELP

Business is after all a reciprocal matter. Stores are not alone for the merchants who own them nor are they only for the people who trade with them. Without the other the merchant cannot sell and the customer cannot buy. And reasoning in the negative, if the merchant does not satisfy the customer the customer will trade elsewhere, and if the customer trades elsewhere the merchant is deprived of the opportunity of striving to satisfy the customer.

By trading at home with the home town merchants the people of Chinook become the architects of their own business places. They create the demand and the home town merchant, assured of the demand, does not fail in meeting it. It is always more convenient to trade at home, and assured of you trade the home town merchants will find it quite convenient to meet every merchandise wish.

Every citizen of Chinook and district is interested in the growth and improvement of the community, but some of those who trade out-of-town do not realize that community improvements begin with the improvement of its business. The business of a town is its life-blood. Knowing this no citizen will stunt the natural and deserving expansion of his home town while fostering that of another community and its business.

Wheat Pool Advocates Clean Seed

The Wheat Pool is strongly advocating that members sow only good, clean seed in order that the high quality of Canadian grain may be maintained. Wheat grown on the Canadian prairies has its reputation of being the best wheat in the world. The Pool is obtaining substantial premiums for its members' wheat over the prevailing price of wheat grown in other lands. This high standard should be maintained.

Of late there has been a tendency for Canadian wheat to be a mixture of many varieties, some of which are very much inferior to Marquis. This is a dangerous drift and should be discouraged. The Pool is concerned in maintaining the high milling and baking quality which has made Canadian wheat very popular in importing countries.

The use of good seed means higher yields, better grades, through maturing evenly and freedom from weeds and intermixtures of other grain. Good seed germinates vigorously and uniformly and gives a higher percentage of seedlings capable of resisting unfavorable climatic and soil conditions.

George McIvor, western sales manager for the Wheat Pool says:

"From the standpoint of the wheat salesman I would desire nothing better than that all our wheat in the province of Alberta be of the highest grade. It is my opinion that the European miller will always desire to purchase reasonable quantities of high-grade Canadian wheat. He must purchase this wheat to give the necessary strength to his flour. There is no question but that the world at large appreciates the quality of our high-grade wheat. In my opinion anything that the growers of this province might do in the way of purchasing pure seed will be a decided aid to the Pool in the sale of its wheat to the world's market."

Bonarr Fights Evolution Theory

WINNIPEG, March 10.—Declaring that evolution is a question of outstanding importance for the consideration of the federal and provincial governments of Canada, R. A. Bonarr, K.C., eminent criminal lawyer of Winnipeg, favors abolition of this subject from the public school curricula.

Here and There

The Canadian Pacific purchasing office located at Sicomaw, B.C., spent more than \$100,000 in 1926 for Okanagan products. Fifteen years ago such purchases amounted to but \$5,000.

With the fisheries of the province of British Columbia running to \$21,600,000 annually—or half the Canadian total—numbers of enquiries are being received from financial interests in Eastern Canada and the United States, with a view to spying out business opportunities.

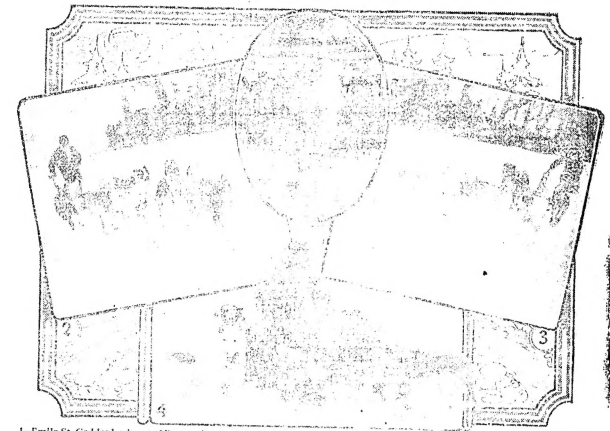

Until the problem of track competition is solved satisfactorily all transportation in Canada will suffer, according to T. E. McDonnell, Vice-President of the Canadian Pacific Express Company, in a Toronto address recently before the Transportation Club. He states that under the present transportation regulations the railway and express companies are operating under very unfair conditions.

For the second time in three weeks the stork has paid a visit to a Canadian Pacific passenger train. Yesterday on the Imperial Limited going east from Vancouver, Mrs. Olson, of Malakoff, B.C., gave birth to a son between Malakoff and Revelstoke. Mrs. Olson was on the way at the time to the Revelstoke hospital. Railway officials and employees did all in their power to render assistance. Telegraphic dispatches from the hospital state that both mother and son are doing well.

The election of J. H. R. Fairbairn, of Montreal, chief engineer of the Canadian Pacific Railway, as president of the Engineering Alumni of the University of Toronto, was announced at a dinner-smoker of the alumni held in Hart House recently. More than 150 graduates acclaimed the new president with the enthusiastic spirit characteristic of a gathering of "School" men. The chief speakers of the evening were Sir Robert Falconer, President of the University, and Mr. Fairbairn.

The rapid strides made by Prince Edward Island's seed potato business, aggregating 800,000 bushels for the past season, mostly shipped to the United States, was the subject of discussion at the 51st annual convention of the New Brunswick Farmers' and Dairyman's Association here. It was pointed out that this business has rapidly developed; that ten years back not a single seed potato was raised outside of the province. The remarkable advance in this business was due, it was claimed, to the production of a disease-free potato.

Youth Victorious in Quebec Dog Derby

1—Emile St. Goldard, winner of Eastern International Dog Derby. 2—St. Goldard's owner on the home stretch. 3—Paddy Nolan, by-stander and timekeeper of the race.

Youth made a successful bid for supremacy in the dog racing realm when Emile St. Goldard, 10-year old dog number from St. Louis, Manitoba, won the Eastern International Dog Derby held at Quebec February 21, 22 and 23. His team of seven black-strained greyhounds hustled over the finish line of the three-day race, covering the 550 metres in 11 hours and 37 1/2 minutes, beating all previous records by 51 minutes and 55 seconds. He secured for the second time, his first in 1925, the hand was dominated by the Quebec International Dog Sled Derby Club.

Leonard Seppala, hero of the sled race with seven to the staid Alaskan dog of Nome, was a strong contender in the Quebec classic and finished just 20 minutes behind St. Goldard. Seppala, experienced driver as he is, was forced to give way to a man 20 years younger, driving a team of better trained huskies than his own. Seppala bettered St. Goldard's time by several minutes in the last day of the race, as the winner was forced to stay on the sled a greater

number of days in a commercial necessity. Here it was that dog racing in Canada first took place. A group of devotees, with him to perpetuate the Alaskan dog racing, gathered in the Snake Room of the Opuscul Hotel and arranged to hold an annual race which they have carried out. St. Goldard has been the winner of this long race at the past several years, including the race in 1925.

Out of 100 dogs in the recent race at Quebec, there were but three recognized "blood" dogs. They were "Daddy" St. Goldard's leader; "Paddy" Nolan's lead dog and "Daddy" trained by the youthful Nolan. Frank Pupils, winner of the race last year, finished 5th with but three dogs in harness. It is the driver who can successfully train the leader of the pack who is going to pilot his team to victory. Dada is a team are not unlike any other racing animals; there must be a salute. Seppala's famous Alaskan malamutes entered the Canadian race this year seeking victory. They battled bravely but lost to a better-trained team.

A Creamery's Greatest Assets Are Its Cream Patrons

Many features about the Creamery business are very important. It is necessary to have good equipment and efficient employees, plus a good market for the finished product.

More important than all these, however, are our Cream Patrons. We have to depend on You Mr. Cream Shipper, for our cream. To a great extent the quality of our products depends on the quality of the Cream You produce, and the care You take of it.

We want Cream, more Cream, and better Cream, if possible in return for which you can absolutely count on best grade, service and price when you ship your cream to—
